

THE FIRST BACKPACK EQUIPPED WITH AN AUTONOMOUS, UNIVERSAL POWER SYSTEM

The start-up OTONOHM®, a pioneer in nomad-friendly digital solutions, is launching the first backpack that includes an autonomous power system compatible with ALL portable devices.

AUGMENTED NOMAD-FRIENDLY POWER AND A SOLUTION FOR EVERY SITUATION

The OTONOHM® backpack is equipped with an independent, portable, and universal recharging system, compatible with all kinds of portable electronic devices, including laptops*. Designed and patented by OTONOHM®.

This is the first and only backpack on the market equipped with a 230-V type-C outlet, in addition to four USB outlets and a cigarette-lighter socket. With these three output voltages, you can quickly and simultaneously recharge different portable devices, connected or not: laptops,

smartphones, tablets, GPS, cameras, or even speakers, video recorders, lamps, electric coolers, and more.

The power system works with one or two batteries, sold separately, with a 32- to 111Wh capacity (up to 30.000 mAh) according to user needs.

The number of devices a battery can power or recharge varies according to the power of each device.

FREEDOM OF MOVEMENT AND TRANQUILITY OF MIND

The OTONOHM® backpack is the answer to two major daily worries: running out of battery and losing touch with your social network. Allowed on planes (in the cabin), this backpack will become any portable device user's best friend while on the move every day, working outside the office, exercising, traveling, and more.

On the airplane, on the beach, or even on a mountaintop, the OTONOHM® backpack allows users to stay connected to their job and their network.

Its padded back panel, reinforced and waterproofed bottom, padded horizontal handle, wide and adjustable straps, L-shaped structural component for greater stability when set down, and many storage spaces are reliable features and materials that guarantee ergonomic support and comfortable daily use.

TECHNICAL SPECIFICATIONS

Available colors	Charcoal (details: blue) or heather gray (details: blue)
Volume	30 liters
Ultra-strong, water-repellent polyester	
Dimensions	45 x 30 x 21 cm (17.7" x 11.8" x 8.3")
Max. computer size	15" (38 x 25 x 2.5 cm) (15.0" x 9.8" x 0.8")
Weight (bag + rack)	7.1 lb (without battery)
Removable rack under 7.1 lb	The bag can be used alone
Power system with	<ul style="list-style-type: none"> • 1 12-V/8-A cigarette lighter socket • 1 230-V/150-W type-C outlet • 2 battery spaces
Lithium-ion batteries	Works with OTONOHM batteries, sold separately
Battery gauge	4 LEDs
Automatic sleep mode	>10 sec. idle or <2.5 A
Sleep mode deactivation	Long press (5 sec.) of ON button
Comfort	Adjustable straps, ergonomic support
Stability	L-shaped structural component (bag does not tip when set down)
Air transport	Batteries permitted in the cabin (IATA 57th Edition, January 1, 2016) Designed and patented in France (Patent no. FR1655346)
Warranty	2 years
